Education

Dhirubhai Ambani University, Gandhinagar <i>B.Tech in Information and Communication Technology (ICT)</i>	Nov 2023 – May 2027 <i>CPI : 7.6/10</i>
Mangaldeep Vidhyalaya, Ahmedabad <i>Higher Secondary (Class XII), GSEB</i>	2022 – 2023 <i>Percentage : 81.69%</i>
Swastik School, Ahmedabad <i>Secondary (Class X), GSEB</i>	2020 – 2021 <i>Percentage : 93.33%</i>

Technical Skills

Languages: C++, Python, SQL
Frameworks & Libraries: FastAPI, Django, React, Celery
Developer Tools: Docker, Git, GitHub Actions (CI/CD), Azure Container Apps, Vercel, Render, Linux Shell, VS Code
Databases & Vector Stores: PostgreSQL, Redis, Qdrant (Vector DB), SQLite
AI Coding Tools: Claude Code, GitHub Copilot
Areas of Interest: AI/ML, Backend Engineering, Data Structures & Algorithms, Full Stack Development

Projects

AI-Powered GitHub PR Review Agent

Tools: Python, LangGraph, LangChain, MCP, FastAPI, Celery, Redis, Docker, Groq LLM

- Built a **multi-agent code review** system with **LangGraph**, where specialized Security and Performance agents run **ReAct** tool-calling loops and a Synthesizer agent merges findings into structured reviews posted automatically to GitHub PRs as inline, one-click code suggestions.
- Engineered an event-driven async pipeline using **FastAPI** webhooks, **Celery** and **Redis**, with **HMAC** signature verification, idempotent deduplication and retry handling, with **Redis-backed LangGraph** checkpointing to resume reviews after a worker crash.
- Designed an **LLM evaluation framework** with a 15-case golden dataset and **LLM-as-a-judge** model (**Gemini**), reaching **93.3% recall**, **100% precision** and **F2 score of 0.946**; optimized token usage with diff-aware retrieval and a daily budget guard, and deployed via **Docker Compose** and **GitHub Actions CI/CD** on **Oracle Cloud**.

ClauseIQ: Multi-Tenant RAG System for Legal Document Q&A

Tools: Python, FastAPI, LangChain, Qdrant, React, PostgreSQL, Docker

- Built and deployed a full-stack, **multi-tenant RAG** application for question-answering and cross-document comparison over legal PDFs, using **FastAPI**, **Qdrant**, **React** and **PostgreSQL**, with **JWT** auth, per-user data isolation, rate limiting and **SSE** streaming.
- Built a **hybrid retrieval pipeline** combining dense embeddings (**Snowflake Arctic**) with a legal-aware **BM25** tokenizer via **Reciprocal Rank Fusion**, reranked with a **Cohere** cross-encoder, with parent-child chunking to preserve full clause context.
- Built an offline **Ragas** evaluation harness on a 68-question golden set derived from **CUAD** and a judge-free retrieval sweep tool, raising faithfulness from **0.68 to 0.89**, context recall from **0.69 to 0.83** and factual retrieval hit-rate from **65.9% to 70.5%**; shipped to production on Render, Vercel, Neon and Qdrant Cloud with **Docker** and **CI/CD**.

ReachFix: GraphRAG for npm Supply-Chain Security

Tools: Python, LLMs, Knowledge Graphs, RAG, FastAPI, NetworkX, Hugging Face, Docker, MCP

- Built a **GraphRAG** system combining a **knowledge graph** with semantic vector search over **OSV** advisories to answer which projects a vulnerability reaches and through which chain of transitive dependencies, covering **2,466** npm package versions and **296** CVEs/advisories.
- Designed an **LLM query router** (**Groq**, gpt-oss-120b) routing questions to semantic, relational or hybrid graph retrieval, producing citation-grounded answers with hallucination checks, achieving **20/20** fully grounded evaluated answers.
- Improved retrieval precision by diagnosing a silent embedding truncation in **MiniLM** and switching to windowed chunk embeddings (label-free **precision@5** evaluation), then shipped a production **REST API** (**FastAPI**) and **MCP** server that scans a lockfile/**SBOM** and recommends the smallest safe upgrade; deployed on Render via **Docker** and **GitHub Actions CI/CD**.

Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Object Oriented Programming
- Computer Networks
- Computer Systems Programming
- Software Engineering
- Machine Learning
- Optimization

Achievements

- Achieved **Knight** badge on LeetCode with a highest contest rating of **1903**, placing in the top **5%** of users.
- Solved **1400+** Data Structures and Algorithms problems and competed in **110+** contests across LeetCode, Codeforces, CodeChef and GeeksforGeeks.
- Ranked **153** in the ACPC Merit List for Engineering Admissions, Gujarat, scoring **110.5/120 (99.64 percentile)** in GUJCET.

Positions of Responsibility

- Event Coordinator**, Raaga and Rhapsody – Synapse Cultural Fest, DAU (Feb 2025): planned and executed one of the fest's main music events, coordinating artists, technical staff and volunteers for **300+** attendees.
